

Active Minds...

*imagination, infinite possibilities,
new friends and a love for learning*

Our Philosophy

Akers Academy recognizes the importance of “Active Minds”. The need to successfully manage, contribute, grow and learn from life, demands our minds to be constantly engaged in learning. Our “Active Minds” curriculum stimulates physical, social and intellectual growth.

We strive to develop, enhance and expand our children’s abilities through a combination of child-initiated activities, teacher directed lessons and experiences.

Child-initiated activities under teacher guidance help children to explore, question and investigate the world and things around them. Teacher lessons expand our children’s knowledge and abilities by guiding them to new ideas, experiences and fun while instilling a love of learning.

The basic elements within our Early Childhood Development Program detail activities within the curriculum and actively demonstrate the progressive building of developmentally appropriate learning skills in each classroom level, allowing for individual growth and challenge.

Our curriculum has a monthly theme, skills and concepts. Each is enhanced by stations, games, group and individual activities. Our parents are a part of their child’s learning day and kept informed through posted lesson plans, daily take home sheets for our 2’s and under, and weekly newsletters for our Pre-k 3’s and up. Fun events that promote socialization and school spirit infuse our curriculum with family.

We want you to feel confident in your choice of the best school programs for early childhood development. Akers Academy provides an environment where your child will be safe, secure, cared-for, challenged and happy.

Thank you for your interest in our school. We look forward to enhancing your child’s active mind.
